Terms of Reference of the IRIC:

- Develop institutional research policies, plans, and initiatives as required to support medical research and innovation.
- Prepare an Annual capacity building plan for research and innovation under the Medical Research Development Program (MRDP) in the institute.
- Encourage multidisciplinary research projects across various departments.
- Facilitate and promote Intramural Research and provide necessary support.
- Motivate faculty to develop and submit research proposals to external funding agencies and institutions.
- Monitor and oversee the ongoing research activities within the institution.
- Maintain records of research publications authored by college faculty throughout the academic year.
- Review the progress of all research (report to be presented by the IRIC committee member secretary)
- Guide and ensure the publication of a quarterly newsletter and an annual report on the research and innovation-related activities of the institute
- Any activities deemed fit for attaining the objectives of promoting research and innovation in the institute
- All IRIC members will be part of the organizing committee for MRDP and CRP
